## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A (1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the examiner on form PTO-892 has cited the references, they have not been considered.

### ***Drawings***

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: In paragraph 45 line 1, it states "and as seen in Figure 9 is the power source 45." Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement-drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the examiner does not accept the changes, the applicant will be notified and informed of

Art Unit: 3611

any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. In addition to Replacement Sheets containing the corrected drawing figure(s), applicant is required to submit a marked-up copy of each Replacement Sheet including annotations indicating the changes made to the previous version. The marked-up copy must be clearly labeled as "Annotated Sheets" and must be presented in the amendment or remarks section that explains the change(s) to the drawings. See 37 CFR 1.121(d)(1). Failure to timely submit the proposed drawing and marked-up copy will result in the abandonment of the application.

### ***Specification***

4. The disclosure is objected to because of the following informalities: Throughout the specification, the words "drawbar" and "draw bar" have been used inconsistently. In paragraph 45 line 2, the power source 45 is not shown in Figure 9. In paragraph 54 line 1, "actives" should be replaced with "activates". In paragraph 56 line 3, Figure 7 does not correspond to the power source being electrically connected to the illumination means and speaker means.

Appropriate correction is required.

### ***Claim Objections***

Claim 10 is objected to because of the following informalities: "a" should be replaced with "an" in line 3. Appropriate correction is required.

***Allowable Subject Matter***

5. Claims 1-16 are allowed.
6. The following is a statement of reasons for the indication of allowable subject matter: the prior art fails to disclose a trailer alignment apparatus comprising a quick adjusting clamping system that has a upper and lower member and a pressure actuated paddle switch assembly.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Murphy (U.S. Patent No. 6139041), Wells (U.S. Patent No. 5970619), Amerson (U.S. Patent No. 6827363 B1), and Cross (U.S. Patent No. 6273448 B1) disclose a trailer alignment apparatus having masts mounted on the hitch and trailer.
8. This application is in condition for allowance except for the formal matters set above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
